

AN AI POWERED DATA SECURITY PLATFORM FOR DATA-DRIVEN ORGANIZATIONS

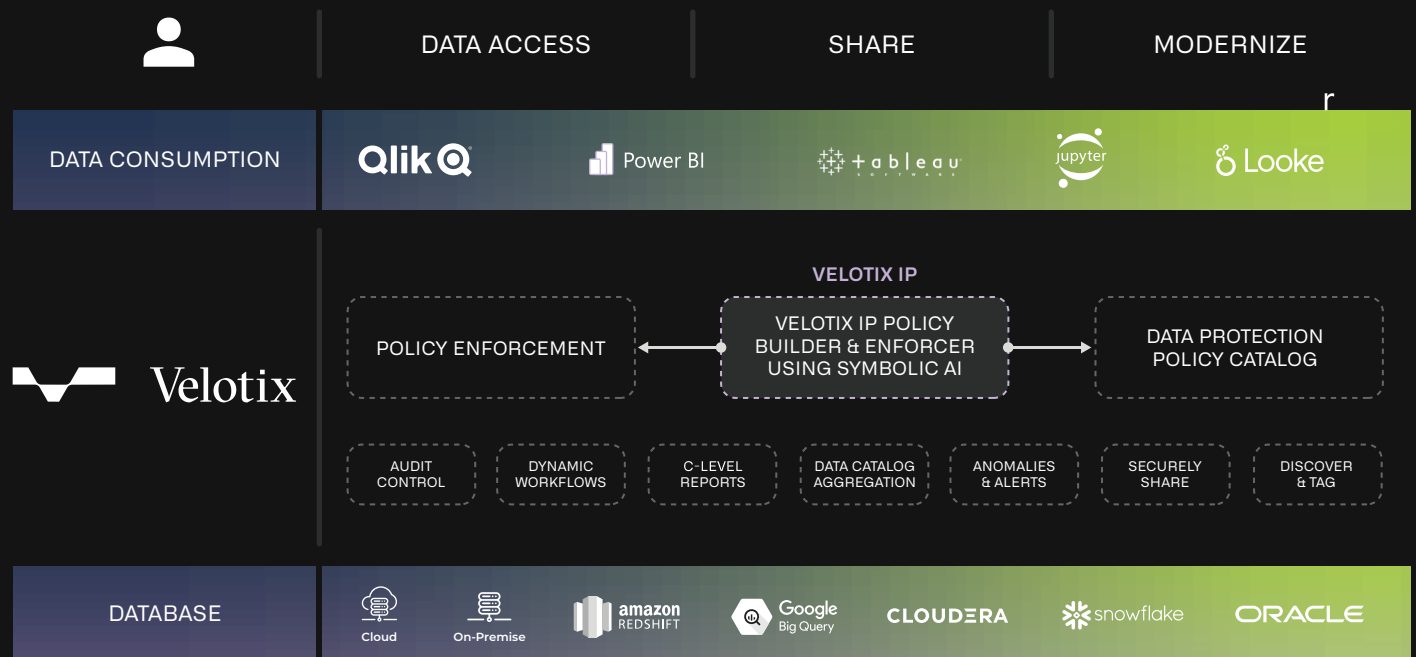

THE DATA CHALLENGE

Organizations increasingly rely on data analytics to optimize operations, improve insights, and make smarter, more educated business decisions. Yet in a world of constantly evolving privacy policies and regulations and rules to apply and track, risk of violation and fines are paralyzing business agility. Organizations are prevented from leveraging their greatest asset: data.

WHAT WE DO

Velotix introduces a data protection and access permissions platform. Our patented AI technology learns from requests and approvals, making granular recommendations that automatically update organizational policies, forming an easy to operate enterprise data protection policy catalog. Global enterprises use Velotix to govern, log, and control compliant access to data throughout the entire data usage lifecycle. Velotix removes risk, automates privacy protection at scale, and provides access to data.

- VELOTIX CONNECTS TO ANY AND ALL DATA STORAGE
- USERS CAN SUBSCRIBE AND ACCESS DATA FROM ANY TOOL USING ANY LANGUAGE
- THE VELOTIX ENGINE BUILDS COMPLEX POLICIES THAT ARE DYNAMICALLY ENFORCEABLE WITH NO CODE NECESSARY
- COMPLIANCE IS GUARANTEED THROUGH DETAILED AUDIT LOGS
