

Automated Data Security Platform Powered By AI

Data Is The Most Valuable Asset On Earth

Enterprises rely on data to make brilliant decisions, identify opportunities and forecast the future. Yet, without the right data protection, visibility and control, your database becomes your biggest risk. At the same time, those who already have data security may be locked out of using their greatest asset.

How We Securely Connect People To Data

Velotix allows you to freely discover and use your data while remaining secure and compliant. Our automated data security platform, DSP, uses AI to enforce the right policies and grant access to the right people in a prompt and secure way.

How Data Access Works

01

We connect and
discover your data

04

We enforce the right
policy using AI

02

We visualize, autotag
and organize your data

05

You receive the
data promptly and
securely

03

You request
data access

The Data Access Lifecycle

Velotix Automated Data Security Platform: The Modular Approach

Unlock The Power Of Your Data

DYNAMIC DATA SECURITY	Experience intelligent data security that learns how to apply your access policies getting smarter over time.	AUDIT SUPPORT	Track data lineage and create reports to understand the reasoning behind data access.
DATA DISCOVERABILITY	Aggregate and organize all metadata into a single source of truth, so you gain visibility and control over who has access.	DATA AUTO TAGGING	Streamline the process of organizing, searching and analyzing large amounts of data with automated tagging based on content features or patterns.
SELF-SERVE DATA ACCESS	Control all data access requests and streamline approvals for access in minutes.	DATA SEARCH	Search and access data with ease using a search engine based on NLP technology.
AUTOMATED INTELLIGENCE	Build complex policies that enforce who has data access, when, where, how, and why.	GENERATIVE AI	Use the power of generative AI to create new policies and update existing ones then grant access accordingly.

Our Story

Data is your greatest asset. It should be secure and easy for you to use. That's why our data security platform automates policy management using the power of AI to provide enterprises with faster data discoverability and access. At Velotix, you connect your database, request data access, and we enforce the right policy at the right time so you receive data promptly and securely. That way, you unlock the power of your data and remain policy compliant.
