Velotix

Velotix Solutions

**Grant Secure
Data Access
At Scale**

Velotix is the AI data
security platform that
helps your enterprise
freely discover and
access your data while
remaining secure and
compliant.

Velotix

Discover, Organize, and Analyze Data

Identify sensitive information so you can protect it.

Data Discovery

Protecting your data starts by knowing what you have and where.

- Gain Visibility & Awareness
  Know what data you have and where it sits.

- Protect Your Sensitive Data
  Classify your data so you gain insights on what needs protection.

- Remain Policy Compliant
  Secure your data so only the right people have access.

———

Permission Discovery & Analysis

Understand how data permissions are granted within your enterprise so you can identify patterns, spot anomalies, and prevent misuse.

- Reduce Risk & Protect Data
  No more locking up your data or giving too much away.

- Improve Productivity & Compliance
  Discover your permissions, control how they're used, and automate upkeep.

- Detect Threats & Anomalies
  Identify patterns and exceptions to the rules so you can correct them quickly.

Velotix

Empower Your Enterprise with Data Access

Grant data access on the attribute level and make faster decisions with AI policy recommendations.

Self-Serve Data Access

Streamline data access to the right people in minutes so your enterprise can maximize foresight.

- Grant Faster Data Access
  Make it possible for employees to gain access in minutes not days.

- Unify Data Policies
  Apply your permissions across any connected database so all your platforms are aligned.

- Empower Decision-Making
  Leverage your data to optimize your strategy, identify trends, and improve efficiency.

—

PBAC

Go beyond roles and attributes and grant data access based on policies for optimized auditing and governance.

- Remove Manual Work
  Automate requests so your team receives the data they need without compromising security.

- Build Customer Trust
  Protect your customers' personal information so they can engage with your business without risk.

- Become Agile
  Accommodate changes to organizational structure and policies, so you remain compliant.

AI Recommendations

Get AI Recommendations on when to show or hide data so only the right people have access.

- **Get Clear Recommendations**
  Understand what data should be masked and why with easy-to-read directions.

- **Hit the Ground Running**
  Start getting accurate AI Recommendations after just 12 data requests.

- **Resolve Requests Faster**
  Speed up decision-making so it's faster and easier to handle incoming requests.

Stage 03 | Automate Scale

Create a Single Source of Truth

Automate building and enforcing your policy database. Track your data lifecycle, defeat dark data, and ensure policy-compliance.

Policy Database Powered by AI

Reach the final destination of your data security journey and automate building and enforcing your policy database as your enterprise grows.

- **Streamline Policy Management**
  Gain the digital platform you need to keep up with changing regulations.

- **Save Time & Energy**
  Automate policy updates, audits, and compliance without using up valuable resources.

- **Optimize Policy Creation**
  Use AI Recommendations to create policies that align with your business and security goals.
